## GET YOUR TRANSFORMATION IN 3 EASY STEPS:

**1** Book an Appointment over a Call.

**2** Get a site inspection and a quote from us.

**3** Get ready to have your roof panels installed.

# WHY PICK CONSERVATORY ROOF PANELS OVER ALTERNATIVES?

1

## Panels are a more affordable alternative to tiled roofs and achieve the same result

Tiled roof systems are typically installed to:

- Ensure your conservatory stays a consistent temperature with the rest of your home
- Reduces noise when it rains
- Increases the energy efficiency of your home

Panels do exactly this too at a much better price. You don't need to break the bank to enjoy your conservatory!

2

## No building regulations are needed

Tiled Roofs are classed as alterations, which require building regulations.

Our Insulated Panel Systems class as replacements, which doesn't require these regulations.

This makes the whole process quicker and easier for you.

# WHY PICK CONSERVATORY ROOF PANELS OVER ALTERNATIVES?

3

## Weight difference

The construction of polycarbonate, glass or tiled roof systems are heavy, meaning some existing conservatories cannot take this weight.

The end result? All you wanted was a new roof, and now you're paying more for making sure your conservatory can take the weight.

Our Panel Systems weight just 2.5kg per square meter, so unless your conservatory is made out of cardboard, it can hold our panels!

4

## Installation times

The simplicity of our system and efficiency of our tradesmen mean that 99% of our jobs take just 1 day to install.

You can be enjoying dinner inside your transformed conservatory on the same day as installation.

Alternatives such as tiled roofs systems normally take a week to install.

# REVIEWS

The work was done in 1 day including cleaning the rest of the conservatory structure to a high standard.

The work was done to a high standard and everything was left clean and tidy. Very professional.

Excellent service. Service was quick and efficient. I would recommend Comfispac to friends.
